Municipal Palm House in the city of Gliwice is the educational venue for popularization of flora and fauna of non-native climatic zones. It enables children and young people to gain information on plants and animals in a much more interesting way than learning from school books. It provides adults with perfect natural surroundings in which they can unwind and relax. For elderly people, on the other hand, the Palm House is a pleasant spot for meetings and socialising with others. Budget admission fees make it possible for every lover of nature to familiarize themselves with the exotic environment. The management of the Palm House maintains a close contact with other similar institutions, enriching thus Gliwice collection with new interesting specimens of flora and fauna.

You are most welcome to visit us.
